

Introducing our new **NO-COST**

Prescription Home Delivery

Starting April 1

Do you take maintenance medication (high blood pressure, cholesterol or another chronic condition)? If so, you can now get a 30- to 90-day supply delivered directly to your home.

- **No Cost** - Home delivery and shipping are free to employees and their dependents
- **Convenient** - Medications are delivered quickly, conveniently and securely right to your door in 5-7 business days.
- **No Worries** - If your medication includes temperature-sensitive drug products, your package will arrive in cold packs.

- **Save Time** - Refill your prescriptions just once every three months – with no trips to the clinic pharmacy. (Some prescriptions will include automatic refills every 90 days, and others may require you to request a refill.)

Our pharmacy partner, Northwind Pharmaceuticals, will send you communication via email, text or phone when your prescription has been shipped.

Here's how it works

Established Patients: use the CareATC app or call 800.993.8244 to request a refill. Begin receiving your refills in the mail by first scheduling an appointment with your CareATC provider.

Non-established Patients:

1. Become an established patient. Simply schedule an appointment with a CareATC medical provider.
2. Bring a list or supply of your prescriptions, including strengths and dosages, to your first appointment – don't forget to include over-the-counter medicines.

**THE
POWER
TO BE WELL**
